Cautions

- Do not try to open the camera by yourself, which may damage the camera or cause electric shock.
- Do not fire the flash in a close distance (less than 1 meter) because it may hurt your eyes.
- Keep the camera away from the reach of children or animals to prevent them from swallowing the batteries or small accessories.
- Stop using the camera if any kinds of liquid enter the camera. If it happens, power off the camera and contact your dealer for further help.
- Do not use this camera with wet hands, which may cause electric shock as well.
- Putting the camera in a high temperature environment may damage the camera.
- Do not use different types of batteries or new and old batteries at the same time.
- To avoid electricity leakage, please remove the batteries if the camera is not in use for a long period.
- It is normal that the temperature of the camera body rises if the camera is used for a long time.

Getting Ready

Turn On or Off the Camera

- Press down the "POWER" button to turn on the camera.
- Repeat the way above to turn off the camera.

Loading the Batteries

1. Slide out Battery Cover to open it.
2. Load 2 x AA batteries into the battery chamber, following the polarity indications.
3. Close the Battery cover.

- The below symbols on the TFT LCD Monitor are the indication of the battery status.
  ( ):Battery power is full.
  ( ):Battery power is half drained. Have new batteries ready.
  ( ):Battery power is drained. Replace the batteries you are using now.
- 2 pcs of AA alkaline / Ni-MH batteries are strongly recommended for normal operation.
- Batteries may lose power if kept inside the camera for a long time without using. Please remove the batteries while the camera is not in use.
- Do not use manganese batteries since they cannot supply sufficient power to support the camera's operation.
- Batteries may not work normally under 0°C or over 40°C.

Getting Ready

Inserting or Removing an SD Card

1. Power off the camera.
2. Open the Battery Cover.
3. Insert the SD card into the card slot and press it down until a click sound happens. (Press down the inserted SD card again to get it out once a click sound happens.)
4. Close the Battery Cover.

✦ Formatting a brand new SD card is strongly recommended for first use.

✦ The image(s) can be stored either in built-in flash memory or in memory card. Only if the memory card is inserted, the images will be stored in the memory card rather than the built-in flash memory. On the other hand, the images will be stored in the built-in flash memory only if a memory card is not inserted.

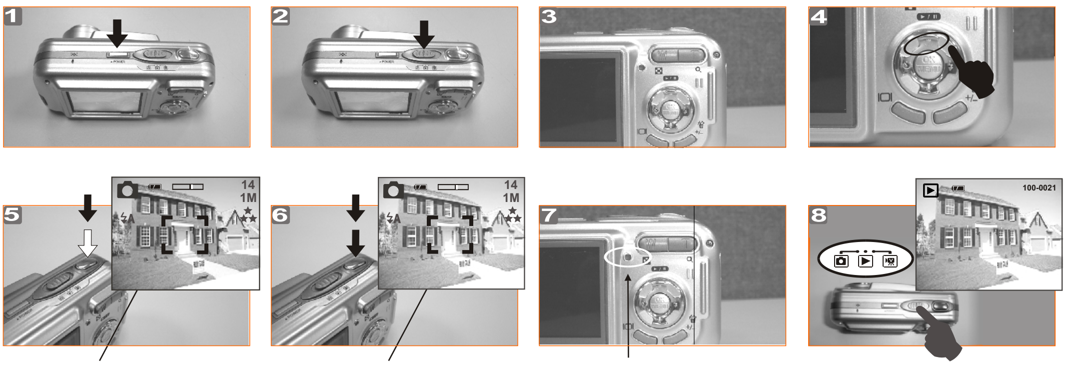

Attaching the Wrist Strap

Getting Ready

Basic Photography

1. Press down the POWER button to turn on the camera.
2. Set the Mode Switch at Image Shooting Mode ( ) for still image or Movie Clip Mode ( ) for video recording.
   NOTE: Hold your camera with your hand and position a subject in the center of the frame to focus on.
3. With the TELE/WIDE Button, you may have 2.8X optica zoom and 5.0X digital zoom for zooming in and out.
4. If the subject you are going to shoot is ranged from 6 cm to 80 cm, pressing down MACRO button to change the focus range.
5. Press and hold the shutter button halfway down.
   NOTE: 1. When the color of the focus frame turns from white to red, it means the auto focus of this camera is not fixed.
   2. When the color of the focus frame turns from white to green, it means the auto focus of this camera is fixed.
6. Press the shutter button fully down to capture an image.
7. The LED Indicator starts blinking right after the Shutter Button is released. Once the LED Indicator stops blinking, you are ready to take another shot.
8. Or you can set Mode Switch at Playback Mode ( ) to view the images or movie clips you just took.

RED (Focus is not fixed)

Green (Focus is fixed)
